Policies And Persons A Casebook In Business Ethics

Policies and Persons-Kenneth E. Goodpaster 1998 This comprehensive collection presents a case-method approach to teaching business ethics, making it ideal for advanced undergraduate- and graduate-level courses in both philosophy and business departments. It contains a wide range of individual, managerial, and corporate cases, many with an international perspective. All cases have been classroom-tested at the Harvard Business School; most have been developed in the field rather than in the library. The third edition is now in softcover for the first time with 15% fewer pages. Nine new cases (of the total 53 cases) cover such topics as labor-management trust, product liability, foreign bribery, the Dow bankruptcy over breast implant lawsuits, and more. A new appendix, “Ethical Frameworks for Management,” provides students with ethical frameworks for analysis and a second new Appendix, “Bridging East and West in Management Ethics,” discusses certain basic similarities between Asian and Western ethical ideals.

Corporate Responsibility-Archie B. Carroll 2012-08-30 This thought-provoking history of corporate responsibility in the USA is a landmark publication documenting the story of corporate power and business behavior from the mid-eighteenth century to the modern day. It shows how the idea of corporate responsibility has evolved over time, with the roles, responsibilities and performance of corporations coming increasingly under the spotlight as new norms of transparency and accountability emerge. Today, it is expected that a corporation will be transparent in its operations; that it will reflect ethical values that are broadly shared by others in society; and that companies will enable society to achieve environmental sustainability as well as a high standard of living. As we enter the second decade of the twenty-first century, the social, political and economic landscape is once again shifting: the need for an informed public conversation about what is expected of the modern corporation has never been greater.

Citation Classics from the Journal of Business Ethics-Alex C. Michalos 2012-08-01 The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy, with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

Notable American Philanthropists-Robert T. Grimm 2002 This book provides substantial profiles of individuals and families who made significant contributions to the American philanthropic tradition from the 1600s to the present. The volume encompasses men and women who significantly shaped American life by their dedication to voluntary service or charitable donations. The 78 entries describe 110 individuals (a number of essays describe entire families, such as the Rockefellers, Booths, and Guggenheims). Most essays are 1,500-2,500 words in length, but family entries range from 2,500-9,000 words. Each essay examines a philanthropist's early years, education, and career, and then focuses upon his or her philanthropic philosophy and actions. Particular attention is paid to an individual's motivations and justifications for philanthropy. Short samples of each philanthropist's writings are included, and the important societal contributions of each individual's philanthropic activity are assessed. All entries are cross-referenced and include a bibliographic list of references (print and nonprint sources). Many feature photos, and some describe the location of personal papers and other manuscript sources. This book also includes a preface, introduction, timeline, and lists of videos and children's books on American philanthropy. Sixty scholars contributed to this volume, each of who is notable for work on certain individuals or in the broad field of American philanthropy. These contributors did a great deal of original research, making this book the only source for detailed information on many of the included individuals.

A Casebook in Interprofessional Ethics - Jeffrey P. Spike 2016-02-13 The first ethics casebook that integrates clinical ethics (medical, nursing, and dental) and research ethics with public health and informatics. The book opens with five chapters on ethics, the development of interprofessional ethics, and brief instructional materials for students on how to analyze ethical cases and for teachers on how to teach ethics. In today's rapidly evolving healthcare system, the cases in this book are far more realistic than previous efforts that isolate the decision-making process by professions as if each is not embedded in a larger context that involves healthcare teams, hospital policies, and technology. The central claim of this book is that ethics is an important common ground for all of the health
professions. Furthermore, when we recognize that our professions converge upon a common goal we will find less conflict and more pleasure in working together.
