A Sound Start-Christine E. McCormick 2002-04-26 This book is an ideal resource for any teacher who wants to include explicit phonemic awareness instruction in an early reading program. In one easy-to-use 8 1/2" x 11" volume, the authors present three separate sets of phonemic awareness lessons, complete with scripted directions and reproducible learning materials and assessment tools. Incorporating a variety of fun and engaging activities, each set of lessons is field-tested and research-based. Included are developmentally sequenced lessons for the whole class and small groups, more intensive lessons for children struggling with phonemic awareness, and class lessons on the consonant phonemes to help children hear and process the sounds of American English. The lesson sets can be used independently or in combination with each other, and can easily be adapted to meet the needs of specific classes.

Clinical Approaches to Emergent Literacy Intervention-Laura M. Justice 2006-11 This seminal text provides a scholarly overview of evidence-based approaches to emergent literacy intervention as a necessary component of clinical practice in speech-language pathology. Numerous books are available on the topic of emergent literacy, yet few are developed specifically for the speech-language pathologist. The scope of this book is comprehensive yet focused: it is tailored to identify state-of-the-art approaches on a range of topics in the area of emergent literacy, yet focuses its emphasis on children from toddlerhood to kindergarten. This period corresponds to the emergent literacy years, which precedes children’s transition to beginning reading. Each chapter provides scientifically cited background information relevant to the content of the chapter before discussing the "How To" and the "Why." Figures, tables, and charts throughout the text are easily accessible to the busy practicing clinician. By providing a usable integration of theory and research, it encourages readers to think about building early foundations in literacy to promote healthy early development, and emphasizes the specific approaches speech-language pathologists need to employ when targeting literacy in childhood intervention. Designed for speech-language pathologists at both pre-professional and post-graduate levels, the book will also be of value to reading specialists, literacy coaches, special educators, preschool and kindergarten teachers, and others.

Cambridge Global English Stage 1 Activity Book-Caroline Linse 2014-05-22 Cambridge Global English (1-6) is a six-level Primary course following the Cambridge Primary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. Activity Book 1 provides additional practice activities to consolidate language skills and content material introduced in Learner's Book 1. Nine units correspond with the topics, texts and language input of Learner's Book 1 with each lesson of the Learner's Book supported by two pages in the Activity Book. Learning is reinforced through activities clearly framed within the 'I can' objectives of the course, opportunities for personalisation and creative work and a higher level of challenge to support differentiation. Each unit in the Activity Book ends with a quiz, offering more in depth assessment for learners. CEFR Level: towards A1.

Teaching Science and Technology in the Early Years (3-7)-Dan Davies 2019-04-30 Teaching Science and Technology in the Early Years (3-7) celebrates young children’s amazing capabilities as scientists, designers and technologists. Research-based yet practical and accessible, it demonstrates how scientific designing and making activities are natural to young children, and have the potential for contributing to all aspects of their learning. By identifying the scientific and technological concepts, skills and activities being developed, the book enables the reader to make more focused diagnostic observations of young children and plan for how they can help move them forward in their learning. This third edition has been thoroughly updated and features: fresh insights into young children’s learning from neuroscience and ‘new-materialist’ perspectives; a UK-wide perspective on Early Years curricula and how they support the inclusion of science and technology as an entitlement for young children; new case studies of successful, evidence-based Early Years practice, alongside new examples of practical planning for learning, and advice on documenting children’s learning stories; an updated chapter on assessing and documenting children’s learning, drawing upon findings from the Teacher Assessment in Primary Science (TAPS) project at Bath Spa University. Based on the latest research and first-hand experience, this practical and accessible book is essential reading for Early Years and Primary students on undergraduate, PGCE and Masters-level courses.

50 Early Childhood Literacy Strategies-Janice J. Beaty 2009 50 Early Childhood Literacy Strategies is the answer to the early childhood teacher's dilemma of how to teach reading to children 3, 4, and 5 years of age as mandated by the state and national governments. This book presents an easy-to-use, easy-to-understand approach involving young children's own emergence into the world of speaking and listening, reading and writing. Teachers will quickly learn what picture books and activities to use with children, how to use them, and how children can benefit from their use. They will learn what to expect as young children's writing emerges from scribbles to pictures and real words. Finally, they will come to terms with the concept of emergent literacy as it appears in preschool children and evolves into conventional literacy as it is taught in elementary school. A brief introduction to each strategy-Discussing the literacy concept associated with the strategy and what the particular strategy teaches. Sets the stage for students understanding of when, how, and with whom to use each strategy - supplies the background needed to create additional strategies to reinforce each lesson. Use of materials, content, and activities found in most early childhood classrooms-Blocks, chalk, crayons, computers, cooking, dolls, dramatics, finger paints, puppets, scissors, storytelling, etc. Makes the books' strategies immediately useful for prospective teachers' first classrooms - allows these fifty ideas to serve as templates for hundreds of additional strategies. Photos, children's art, and pupils' actual writing samples-Accompanying each strategy. Offer a genuine picture of each strategy's desired outcome - illustrate real children's authentic literacy efforts and show actual children actively engaged in each strategy.

Healthy and Sustainable Fundraising Activities-Jenine M. De Marzo 2012-05-07 For most schools and organizations, fundraisers bridge the gap between budgets and the money they need in order to operate. Despite the continued rise in childhood and adult obesity and increased attention to humankind’s ecological impact, many fundraisers still rely on the sale of high-calorie, low-nutrient foods or ask supporters to become consumers of incidental items and paper products “to support the cause.” Healthy and Sustainable Fundraising Activities offers innovative and thoughtful options that raise money for your cause without contradicting the physical activity, health, and ecological messages emphasized in your school or organization. In contrast to traditional fundraisers involving food and incidental products, the ideas in Healthy and Sustainable Fundraising Activities encourage personal, community, and environmental health and reinforce the health and social responsibility initiatives in place in your school or organization. With Healthy and Sustainable Fundraising Activities you’ll learn how to involve not just your school or organization but the entire community in health-promoting, environmentally friendly activities. With Healthy and Sustainable Fundraising Activities, you’ll find a range of ideas—from ink cartridge recycling to a dance competition—and a unique approach to fundraising sure to energize your students, members, and community to meet and exceed your fundraising goals. For educators, each of the activities outlined in the text is based on National Health Education Standards (NHES) and National Association for Sport and Physical Education (NASPE) standards and 21st-century learning outcomes, making this text a great resource for incorporating the health and wellness initiatives of your school into the fundraising plans for your class, club, sport team, or organization. Activities in the book are grouped according to the level of knowledge, skills, and abilities required for organizing and conducting them. Most activities use similar or commonly used resources often available in a school or organizational setting. You’ll find clear and complete explanations in a standard lesson plan format along with the tools and information you need in order to implement each idea. With background information on various types of fundraisers, how these types are categorized, and guidance on scheduling, implementing, and communication, you’ll have a full picture of what it takes to complete each event. Get your members and community involved in a project that not only raises money but also gives children exposure to important values such as lifelong wellness, hard work, perseverance, integrity, and civic engagement. Regardless of whether you are new to fundraising or simply searching for new ideas for your next project, Healthy and Sustainable Fundraising Activities offers the tools, information, and inspiration to help you reach your monetary goals in ways that contribute to the health and well-being of your students, members, community, and the environment.

Using Circle Time to Learn About Stories-Craig Deed 2007-10-25 Includes CD-Rom By combining the traditional classroom activity of reading stories with Circle Time, these activities provide students with opportunities to practise listening, expressing ideas, asking questions, using imagination, making predictions, experimenting with thinking and learning strategies and collaborating with other students. Each of the six stories in this book is linked to a series of key questions, games and activities. These help the students to explore the stories' contexts (time and place) and patterns (plot and choice) and to analyze the characters and their own emotional responses. All the stories and activities are easily printable from the accompanying CD-rom. Written for teachers in primary settings, this book is linked to the National Literary Strategy and the PSHE curriculum.

The Crisis- 1945-06 The Crisis, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

Social Enterprise and Special Events-Julie Olberding 2016-11-25 During the past twenty years, the field of nonprofit management has grown significantly in terms of the number of nonprofit organizations, number of people employed, and amount of funds raised. A key activity in nonprofit management has been organizing events, which are generally defined as "purposive gatherings of people." These purposes may include: increasing awareness about the nonprofit organization and its mission; raising funds to support programs and services related to its mission; engaging and developing individuals as donors, volunteers, and advocates; and enhancing the image of the organization and/or the broader community. Events in the modern era tend to be organized across the nonprofit, public, and private sectors. While a nonprofit organization may create and manage an event, corporations and businesses often contribute financial support and technical expertise in areas such as branding, marketing, and social media. Depending on the event type and size, a local government may provide the venue and public safety services, including police, fire, and ambulance. We can understand more about these mission-driven, cross-sectoral events by looking through the lens of social enterprise. Social enterprise has been defined as a venture that advances a social mission using business methods or market-based approaches. It is typically conceptualized as spanning sectors, particularly the nonprofit and private sectors. Social Enterprise and Special Events focuses on how market-based approaches can be used to help mission-driven gatherings achieve their purposes as efficiently, effectively, and sustainably as possible. These approaches include market research, brand development, cause marketing, gamification, liquidity, cash management, and clustering. The book also incorporates concepts important in the nonprofit and public sectors such as collaborative governance, social capital, political capital, community development, placemaking, and diversity.
