Theology from the Belly of the Whale-Frederick Herzog 1999-05 The late Frederick Herzog, long-time professor of systematic theology at Duke Divinity School, frequently
challenged his peers to expand the boundaries of the field by doing theology "from the belly of the whale." In brief, he never stopped reminding the church and theologians that they should listen to those who had been left out of their influential ranks: the marginalized, African Americans, Native Americans, women, and the poorest of the poor in Latin America. This reminder is the thread that holds together Herzog's work, made available here for the first time in a single volume.

But in the middle of the disbelief and extreme sorrow, God showed up. Oh, we say we trust God and admonish others to do so all the time when we are Christians, but what do we say to a mother who must face burying her baby when she's ridden with guilt and pain? It seems that the words have not been created until we find that space in time to remember to place ourselves in her space before we answer. That is what it means to enter into "The Belly of the Whale." This book is a must read for all!

In the Belly of The Whale - Naimah Abraham 2021-02-26 In an open diary of poetry and
prose Naimah speaks of the darkness of heartbreak and healing in threefold: the COVID-19 pandemic, the Black Lives Matter movement and the end of her marriage. For many, the year 2020 was a year of challenges. Pain, heartbreak and ultimately hope are brought to life in reflections, poems and passages. In parts, the grip of trauma is tight. At other times, the writing is a dreamscape, scattered with wisdom and emotional honesty. One truth is evident - no matter how many layers deep, darkness must end and at the end of hurt, there is always healing. There is always light.

**Portraits from the Belly of the Whale**-Michael Garlington 2005 Garlington's images shimmer and flicker, lighting a pathway to an absurd land of dreams. 100 fantastical portraits which subvert reality. Garlington's eye is unsparing, yet his images also convey a wry compassion for the outcast. His images are more than mere portraits of the bizarre as he simultaneously dissects and embraces his subjects as fellow pilgrims. Some of the images in this book come from cross-country excursions in Photo Car, a sedan Garlington covered with samples of his work. The car served as a magnet and an ice-breaker to draw subjects to his lens.

Policing-Chris Braiden 1992 This paper, written by a Canadian police veteran with 30 years 
experience, discusses the problems that exist in modern police culture and proposes some
solutions. The conclusion drawn by the author is that policing is cultist, with members paying more attention to the myth that surrounds the profession of policing than the reality of the police role in society. Conventional policing appeals to people who are drawn to the law enforcement function and pushes away those who may be suited to the broader police vocation of community peacekeeping. The author stresses the need to demystify police culture, to cultivate effective leaders, and to develop a new model of urban policing.

**The Sounding of the Whale**-D. Graham Burnett 2012-01-09 From the Bible’s “Canst thou raise leviathan with a hook?” to Captain Ahab’s “From Hell’s heart I stab at thee!,” from the trials of Job to the legends of Sinbad, whales have breached in the human imagination as looming figures of terror, power, confusion, and mystery. In the twentieth century, however, our understanding of and relationship to these superlatives of creation underwent some astonishing changes, and with The Sounding of the Whale, D. Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters, useful only as wallowing kegs of fat and fertilizer, to playful friends of humanity, bellwethers of environmental devastation, and, finally, totems of the counterculture in the Age of Aquarius.
When Burnett opens his story, ignorance reigns: even Nature was misclassifying whales at the turn of the century, and the only biological study of the species was happening in gruesome Arctic slaughterhouses. But in the aftermath of World War I, an international effort to bring rational regulations to the whaling industry led to an explosion of global research—and regulations that, while well-meaning, were quashed, or widely flouted, by whaling nations, the first shot in a battle that continues to this day. The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s, as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation. A sweeping history, grounded in nearly a decade of research, The Sounding of the Whale tells a remarkable story of how science, politics, and simple human wonder intertwined to transform the way we see these behemoths from below.

The Dag Gadol-Pat O'Rouke There were earlier civilizations that experienced and lived destinies. They understood the destinies and lived it. That you have neither read nor understand them does not amount to their nonexistence. They existed. Though reasonable people understand that hearsay testimonies are worthless, some Holy Book believers have used the New Testament reference to Jonah, a hearsay, as evidence that a whale, they mistakenly defined as a “fish,” swallowed up an adult human being. Perhaps you’ve heard of
the movie Jaws. This was no movie. Some say it was/is a myth. Incontrovertible science evidence says anyone in the belly of a whale would suffocate to death for lack of oxygen. A whale swallowed a human; can you see the anthropomorphism? Anthropomorphism and zoomorphism were some of the best methods to paint or represent an unknown object of discussion. It was the best vocabulary available to them at that time. A submarine scooping a human is akin to a whale that swallowed Jonah. Perhaps our perception of the past is not what it should be. Perhaps our perceptive truth of the past is jaundiced. Perhaps our knowledge of the past has been erroneously prioritized by the academics. Why would the academics do this? Remember that he who pays the piper dictates the tune. Obviously, we have been conditioned by the academics to accept that our civilization is better than earlier civilizations, therefore making it hard even to contemplate that there could have been better technologies in submarines before today. We are conditioned to totally accept that we are the center of the universe and the supreme beings of living things.

**Out of the Belly of the Whale**-Bruce Roberts Dreisbach 2006 Out of the belly of the whale makes the argument that the greatest underlying reason for the lack of evangelistic fruitfulness on the part of the American church is a fundamental misunderstanding about how God reaches lost people. Lifestyle witnessing, the biblical method for sharing faith with family and friends, can solve this spiritual crisis.

—Nathaniel Philbrick The epic history of the "iron men in wooden boats" who built an industrial empire through the pursuit of whales. "To produce a mighty book, you must choose a mighty theme," Herman Melville proclaimed, and this absorbing history
demonstrates that few things can capture the sheer danger and desperation of men on the deep sea as dramatically as whaling. Eric Jay Dolin begins his vivid narrative with Captain John Smith's botched whaling expedition to the New World in 1614. He then chronicles the rise of a burgeoning industry—from its brutal struggles during the Revolutionary period to its golden age in the mid-1800s when a fleet of more than 700 ships hunted the seas and American whale oil lit the world, to its decline as the twentieth century dawned. This sweeping social and economic history provides rich and often fantastic accounts of the men themselves, who mutinied, murdered, rioted, deserted, drank, scrimshawed, and recorded their experiences in journals and memoirs. Containing a wealth of naturalistic detail on whales, Leviathan is the most original and stirring history of American whaling in many decades.

From the Belly of the Whale-William Jackie Pearson-El 2021-09-10 Poetry from Prison: In this book, the author takes the reader into the place where he served a twenty-two year prison sentence and found his voice as a poet. This is the place where he came to relate to Jonah in the Bible, a man swallowed by a whale as a result of his rebellion. In that prison, the author transitioned out of rebellion into a man who longed to know his calling, while also eager to share his voice through the poetry now captured in this book. This book will inspire readers who are also drawn out of rebellion, addiction, and distractions into their higher calling by God.
